With reference to Proceedings no: dated 1st May last, I have the honor to submit a statement showing the length of the several Channels in the District, the area affected by them directly as well as indirectly, and the establishment proposed to be entertained for their conservancy.

2. It will be seen from this statement that an establishment is proposed to be provided for the Conservancy of Channels led from the Bhimasamudra Tank in the Chitaldrug Taluk. The Tank is a very big one and irrigates the lands of 11 villages. It is therefore utterly impossible for the village officers if any one of them

General and Revenue Department.

Sir,

With reference to proceedings of Government No: 4015 R.T.T.94 dated 25th October 1895, I have the honor to state that the establishment sanctioned for the conservancy of feeder channels in the Molkalmuru Taluk is quite inadequate. There are as many as 5 Anikats across the jungle hills of Chinna Nayaki from which feeder channels are taken to the tanks fed by them. The total length of the whole system is 13 miles and owing to the absence of a responsible official to look after them the clearing of silt in the channels and other work in connection with these works are neglected.
